| 14        | Search researcher                | 8 |
| 15        | Search group                     | 9 |

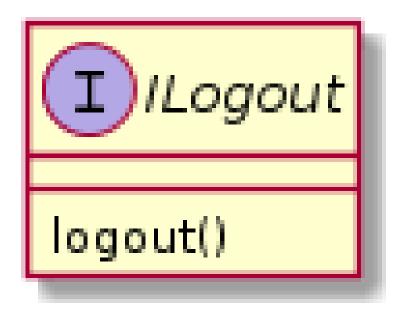

## 1 Register

## 2 Login

#### 3 Logout

### 4 Create appointment

### 5 Time management

We do this on the client side by constructing an object that encapsulates time range information.

#### 6 Delete appointment

Delete operation deletes appointment entity if the invoker of this command is the creator of the appointment. And appointment is deleted only from ivoker's schedule if he is just participant of the appointment.

## 7 Add researcher to an appointment

I IAddResearcherToAnAppointment
add()

## 8 Create group

## 9 Join group

#### 10 Leave group

#### 11 Conflicts

 $\#+ begin_{scr}$  plantuml : file ./iconflicts.png interface IConflicts {  $get_{conflicts}()$  get\_users withconflicts() }  $\#+ end_{src}$ 

### 12 Search appointment

## 13 Search participant

I SearchParticipant
get\_participant\_list()

#### 14 Search researcher

I ISearchResearcher
get\_researcher\_list()

## 15 Search group
